

Topic: Inventory keeping app

Problem: Not knowing if a certain item is in a store during a pandemic, going to said store and not finding the item you were looking for.

Set the target: Have the customer know of the availability of a store's items. The company also knows of the demand of each item.

Analyze the causes: Minimizing contact during a pandemic, saving time and knowing demand for a product

Propose and implement countermeasures: Make a web app that keeps track of the inventory of a store.
